THE HONORABLE DAVID C. TREEN
GOVERNOR OF LOUISIANA
MEMBERS OF THE LOUISIANA LEGISLATURE
MEMBERS OF THE STATE BOARD OF ELEMENTARY
AND SECONDARY EDUCATION

I am respectfully submitting to you this One Hundred and Thirty-second Annual Financial and Statistical Report, in accordance with the provisions of Louisiana Revised Statutes 17:22(6).

We wish to thank each person in the local school districts who contributed to the success of this document by supplying us with much-needed information. We are certain that we are making progress in many areas of education. This publication will help to document this improvement.

Sincerely,

Kelly Nix

PREFACE

The Bureau of Research, Office of Research and Development of the Louisiana Department of Education, is pleased to present this our _One Hundred Thirty-second Annual Report_.

In order to be effective, educators require accurate information so that they may plan, implement, and evaluate sound educational programs. With this end in mind, we have designed this publication. The _Annual Report_ includes data on school funding, enrollments, expenditures, and staffing. Data for each of Louisiana's 66 school districts are included and presented in such a manner as to be a ready reference for busy administrators.

The outline for the _1980-81 Annual Report_ is:

A. State Summary
  Section I. Trends in Louisiana Public Education
  Section II. Comparing Louisiana and the Nation
  Section III. Perspectives and Forecasting
  Section IV. Footnotes
B. Educational Profiles
  Section I. State Profile
  Section II. Parish/City Educational Profiles
C. Index

Because we are committed to making this _Annual Report_ as readable and complete as possible, we sincerely invite your comments and criticisms.

No publication of this scope is ever produced by the efforts of a few. We wish to thank all of the persons in the local districts who so generously gave of their time to make this publication reflect accurate and timely information. Too, our sincere gratitude to those members of the Department of Education staff who worked unceasingly with us in gathering data and coordinating it across Offices and Bureaus.

I. TRENDS IN LOUISIANA PUBLIC EDUCATION

A. Trends in Student Enrollment

population growth patterns

Louisiana experienced a continuous population growth during the decade of the 70s. Because of various factors such as good weather conditions, favorable labor supply, etc., more people have moved to Louisiana recently than have left the state. Too, Louisiana has traditionally had a higher birth rate than the rest of the nation.

While this population growth is both good for our state economy and for the future of education, it is not without its problems. A recent publication[1] indicated that the state's population increased from 3,644,637 in 1970 to 4,203,972 in 1980, an increase of 15.3%. Graph 1 illustrates the greatest population growth areas in the state during the decade. Table 1 details the population growth of each parish in the state from April 1970 to April 1980. It is interesting to note that 12 parishes grew in population more than 25% over the 1970 population figure. This has major implications for these school districts in terms of future planning.

Parishes along the banks of the Mississippi River from Pointe Coupee to Jefferson enjoyed large population increases. The growth appears to be attributed to two factors: increased industrialization and spillover from metropolitan into rural parishes. Livingston Parish claimed the largest increase among these parishes with a 60.7 percent gain. See Graph 1 for more information.

educables

Table 2 represents the number of educables in the state for the last decade. An educable is defined as any child aged six to eighteen who is either attending or not attending school. In 1971 the number of educables peaked and has slowly decreased since. The decrease is due to lower birth rates in the later 60s and early 70s. Higher birth rates in the late 70s will lead to an increase in the number of children aged six to eighteen during a major portion of the decade of the 80s. More information concerning school age children will appear later in this narrative.

student registration

Student registration trends are presented in Table 3. If kindergarten and special education children were removed from these numbers, a small decline in enrollment would occur each year from 1972-73 to 1980-81. The nonpublic school population has been stable during this period with a range of 15.21% to 15.85% of the school age children of our state. Eighty-seven percent of the students in nonpublic schools in 1972-73 were white, while 83% in 1980-81 were white. The public schools were 60% white in 1972-73 and 58% white in 1980-81.

other ethnic group data

School year 1980-81 was the first year that accurate data on the number of Hispanic, Asian and Indian Americans in Louisiana schools were gathered. There were 10,692 students from these other ethnic groups in the public school system and 1,151 in the nonpublic school system.

average daily membership/
average daily attendance

Table 4 details trends in average daily membership and average daily attendance. From 1972 to 1981 average daily membership fell 8.1% and average daily attendance decreased 7.4%.

school dropouts

Trends in Louisiana school dropouts are presented in Tables 5, 6 and 7.

The percentage of students who drop out of public schools did not change significantly over the decade, with the range being from 1.94% in 1975-76 to 2.25% in 1977-78 (see Table 5). Although there are fewer black students than white enrolled in our public schools, they have accounted for a significantly higher dropout percentage. However, this disparity has decreased over the years (see Table 5). In fact, in 1980-81 the percent of black and white dropouts were proportionate to the percent of black and white enrollment.

More detailed information on dropouts from 1980-81 is found in Tables 6 and 7. A larger percent of whites than blacks drop out between the ages of 15 and 17, while a larger percent of blacks than whites drop out below the age of 15 and above the age of 17. A higher percentage of black dropouts (42.1%) leave school before the tenth grade than do white dropouts (34.3%). A considerably higher percentage of the parents of black dropouts (71.1%) do not have a high school education compared to the parents of white dropouts (51.6%).

reasons for
dropping out

White dropouts are slightly more active in extracurricular activities than blacks, but neither group is very active. The reasons that schools gave for the students' dropout is similar for both races, with educational problems and personality and adjustment problems accounting for over 66% of the dropouts. As might be expected, a considerably higher percentage of females (9.4%) than males (1.1%) drop out to marry. There are considerable racial differences in this percentage: 12.9% of the white female dropouts left school to marry, compared to only 4.1% of the black female dropouts.

suspension/expulsion

Tables 8, 9 and 10 depict suspension and expulsion data for black and white students. Approximately 41% of students in Louisiana public schools are black; however, 55% of suspended students are black, and 60% of expelled students are black. Black students are suspended for an average of 2.58 days per suspension while white students are suspended for 1.98 days. Thus, it appears that blacks are suspended more frequently than whites and for a longer period of time (see Table 8).

reasons for suspensions/
expulsions

Tables 9 and 10 compare the most frequent reasons for suspension or expulsion for black and white students. Blacks are most often suspended or expelled for fighting with students student registration

and/or faculty and for disrespect for authority (41%) while only 30% of white students are suspended or expelled for these reasons. Cutting classes, excessive tardiness, and disturbing classes are other major reasons for suspension or expulsion of both black and white students.

While student registration showed a steady decline from school year 1972-73 through school year 1980-81, the absolute number of high school graduates per year increased 1.36% over that period of time. Nonpublic graduates increased 3.3% from 1972-73 to 1980-81, while public graduates increased 1.1%. Public school graduates constituted a steady 84%-85% of the total number of graduates over this period of time. Black students constituted 30.7% of the total graduates in 1972-73 and 31.8% of the total graduates in 1980-81. See Table 11 for more details about the number of high school graduates in Louisiana during this period. Information on the number of students receiving general equivalency diplomas in 1980 and 1981 will be presented later in the narrative.

trends in elementary and secondary registration

Student registration from 1971 to 1981 in regular and special education categories is presented in Table 12. As noted above, there is a decrease in student registration each year during this period when the students in special education are removed from the population. The overall decrease of 10.50% in regular elementary and secondary education was composed of two different trends during the period: elementary enrollment dropped considerably (14.3%), while secondary enrollment dropped only slightly (0.9%). See Table 53 for complete information on registration per grade level in 1980-81.

The drop in elementary enrollment was a function of the decrease in birth rates during the 1960s and early 1970s, while the stability in secondary enrollment reflected the higher birth rates of the late 1950s and early 1960s. It should be noted that enrollment in secondary education peaked in school year 1976-77 and should show the steady decline in the 1980s that elementary schools showed in the 1970s. Conversely, elementary enrollment figures should begin increasing in the 1980s as a function of the increased birth rates of the late 1970s. Table 53 presents student enrollment projections through 1985-86.

There was a large increase in kindergarten and special education enrollment during the past decade. Kindergarten enrollment expanded by 73% from school year 1971-72 through school year 1980-81. Kindergarten enrollment appears to have stabilized around the 68,000 mark, which is approximately 7% of the overall student population.

special education enrollment

Enrollment in special education classes, both elementary and secondary, increased dramatically over the past decade. The increase in elementary special enrollment was 53% during this period, while secondary special enrollment increased over public professional and non-professional staff

175%. Students in special education comprised 3% of the total student population in 1980-81, compared to only 1.6% of the total in 1971-72.

B. Trends in Staff and Structure of Schools

There was an overall increase in both the professional and nonprofessional staffs of the public schools from 1972-73 to 1980-81, as indicated in Table 13A. The professional staff increased by 13.4% during this period, while the nonprofessional staff increased by 19.4%. The staff of public schools was between 58 to 61% professional during this period.

classroom teachers

support staff

A more detailed breakdown of professional and nonprofessional personnel in the public school system is presented in Table 13B. Slightly over 50% of all the staff in the public school system are full-time classroom teachers. Louisiana has traditionally had one of the highest percentages of nonprofessional staff personnel in the nation (see Table 43), and this trend has continued through 1980-81. More than 40% of the public staff in 1980-81 were nonprofessional, with service workers (24.4%) and office/clerical workers (12.3%) comprising the largest categories.

non-public school personnel

Trends in professional and nonprofessional personnel in the nonpublic school system from 1971-80 can be found in the 131st Annual Report of the Louisiana State Department of Education. Starting with school year 1980-81, a new format for reporting nonpublic school personnel was initiated, and data for that first year are reported in Table 14.

public school: ratios for principals and teachers

From school year 1972-73 to school year 1980-81 there were changes in the sex and race ratios of principals and classroom teachers in the public school system, as indicated in Table 15. The 7.7% decline in percentage of white male principals over this period was accounted for by a 2.7% increase in black principals and a 4.9% increase in white female principals. In 1972-73, 74.5% of the classroom teachers were female. This figure had increased to 79.9% by school year 1980-81. Thus, the inverse relationship between percentage of male principals and percentage of male classroom teachers continued unabated during this period. The black-white ratio of classroom teachers stayed approximately the same during the decade.

student-teacher ratios

The student-teacher ratios for public and nonpublic schools for 1980-81 are presented in Table 16. Trends in student-teacher ratios for the period 1971-80 can be found in the 131st Annual Report of the Louisiana State Department of Education. In 1980-81, there were 19.2 students for every full-time classroom teachers in Louisiana public schools. Tables 40-42 present mean class size by class type data, which are a more meaningful measure of the relationship between the numbers of teachers and students in the Louisiana school system.

professional training

The professional training of the public school instructional staff changed considerably during the period from 1972-81 as indicated in Table 17. The number of teachers and principals with less than a college education decreased from 2% of the total to only .54% while the number with a bachelor's degree decreased from 67% to 57.2%. Conversely, the number with more than four years of college increased dramatically from 31% of the total in 1972-73 to 42.3% in 1980-81.

total experience

Table 18 presents the total experience of teachers and principals in the public school system from 1971 to 1981. The number of teachers with fewer than five years of experience decreased from 30.4% of the total in 1971-72 to 23.9% in 1980-81. On the other hand, the number of teachers with five to nine years of experience increased from 21.4% of the total to 26.8%, and the number of teachers with ten to fourteen years' experience increased from 16.0% to 19.9%. Thus, teachers with five to fourteen years of experience increased from 37.4% in 1971-72 to 46.7% in 1980-81. It would appear that attrition is likely to occur within the first five years of teaching. If teachers remain in the profession after this time, they are apt to stay until 20 years of service have been completed.

salaries

The annual salaries of principals and teachers in the public school system increased each year from 1971-81. This trend is presented in Table 19. The increase for teachers was 85% during this period, compared to an 82.5% increase for principals. Salaries for black teachers were slightly higher over this period than those for white teachers. This is probably a function of the longer average experience of black teachers in the public school system.

school facilities

The total number of public and nonpublic schools increased by 3.5% from 1971 to 1981. Thus, while the total number of students decreased, the number of schools increased. There was a net increase of 66 schools, consisting of an increase of 83 schools in the public school system and a decrease of 17 schools in the nonpublic system. See Table 20 for more details.

As indicated in Table 21, there was a net increase in the number of buildings and a net decrease in the number of sites of public school property from 1972-81. Overall, the total cost of buildings, sites and equipment increased 85.1% during this period, with the largest increases occurring during the inflationary 1976-81 period

library data

The number of libraries, librarians, and books all increased from 1971-81, as noted in Table 22. There was a 94% increase in the current payments for salaries, books and supplies during this period.

C. Trends in Education Finance

federal/state revenues

The trend in revenue from local, state and federal sources for education for the 1976-81 period is presented in Table 23. Only the last five years of the decade were included in this trend analysis. Additional information is provided in Graph 2.

Total revenue increased by 63.45% over this five-year period from $1,108,821,752 in 1976-77 to $1,812,397,658 in 1980-81. The percent of total revenue from local sources increased 3.11% over this period, while the percent of the total from federal sources decreased 1.84% and that from state sources decreased 1.27%. As indicated in Table 24, the revenue from ESEA Title I funds increased by 137% from 1971-72 through 1980-81. In 1980-81, ESEA Title I funds accounted for 4.93% of the total revenue for education.

minimum foundation program

The minimum foundation program for Louisiana for the past ten years is presented in Table 25. The overall cost of the program increased by 98.83% over this ten-year period, while local support for the program decreased 4.98%. Thus, the percent of local support for the total cost of the program decreased from 9.82% in 1971-72 to 4.71% in 1980-81.

The expenditure of all state revenues (including federal grants) and of state revenues (excluding federal grants) for all government functions is found in Tables 26 and 27. These figures were taken from the Executive Budgets of the State of Louisiana for the past ten years. The percent of all state and federal revenues going to education ranged from a low of 31.83% in 1980-81 to a high of 36.95% in 1972-73. The percent of state revenues going into education ranged from a low of 35.21% in 1975-76 to a high of 42.13% in both 1971-72 and 1972-73. In 1980-81, 31.83% of all state and federal revenues and 35.68% of state revenues were spent on education.

educational expenditures

Education expenditures by function for the period 1976-81 are found in Table 28. During this period total expenditures increased by 60.15%. The percent of the total amount spent for instruction and for supporting services stayed about the same during this period: 44% to 47% for instruction and 50% to 53% for supporting services. The largest relative increase occurred in instruction for special programs, going from approximately 91 million dollars in 1976-77 to approximately 173 million dollars in 1980-81.

Expenditures per public school pupil for the past decade are found in Table 29. The expenditure per registered student increased from $772.47 in 1971-72 to $1,971.62 in 1980-81. Similar increases in expenditure per pupil in average daily membership and expenditure per pupil in average daily attendance occurred during this period. The expenditure per pupil in average daily membership was $2,085.06 in 1980-81, while it was $2,253.14 per pupil in average daily attendance.

Indebtedness for the state's parish/city school systems totalled $806,615,063 in 1980-81. 95% of this debt was bonded debt. See Table 30A for a breakdown of school system indebtedness for 1980-81. Also, see Table 30B for the total ending balances for cash, petty cash and investments for parish/city school systems in 1980-81.

See Table 54 for more details concerning revenues and expenditures for the State Department of Education for the fiscal year ending June 30, 1981.

II. COMPARING LOUISIANA AND THE NATION

A. Population Characteristics

birth rate

By comparing Louisiana and national education statistics, the relative strengths and weaknesses of the state's educational system can be determined. Louisiana has a unique set of population characteristics, as can be seen in Tables 31, 32, and 33. Louisiana's birth rate has traditionally been among the highest in the nation. From 1960-74 the national birth rate dropped dramatically, and Louisiana's birth rate fell from the fifth highest to the ninth highest in the nation. Since 1975, however, the national rate has increased, and Louisiana's rate has also increased (see Table 31). Provisional estimates[2] of the birth rates for 1979 and 1980 show continued high rates - 19.7 births per 1000 population in 1979 and 19.3 in 1980 - for Louisiana.

school age population

Louisiana ranks fourth in the nation in percent of the population who are school age (Table 32), while ranking forty-seventh in percent of the population aged 21 and over.[3] As a result of this demographic dispersion, Louisiana has 38.5 school-age children per 100 adults aged 21 and over, the fifth highest ratio in the nation in 1978 (Table 33). This large number of school-age children per adult places a heavy education support burden on the adult population.

literacy level

Traditionally, Louisiana has had a high rate of illiteracy. Based on Bureau of the Census estimates, Louisiana had a higher illiteracy rate than any other state in 1950, 1960, and 1970. In 1976, 8.7% of the Louisiana adult population were functionally illiterate or lacking a fifth grade education. Louisiana has ranked slightly better in median school years completed by adults, percent of adults who are high school graduates, and percent of the population who are college graduates, but the state still ranks in the lower quarter of the nation in these categories (see Table 33). The 1980 census will provide more up-to-date data on the current education attainment of adults in Louisiana.

B. Pupil Characteristics

school enrollment statistics

Nationally, the absolute number of pupils in school peaked in 1970 and declined after that due to the lowered birthrate in the 1960s and early 1970s. Louisiana has followed this national trend: there has been a decrease in the absolute number of pupils in elementary and secondary schools (excluding kindergarten and special education) each year from 1970-71 through 1980-81.

A comparison of declines in public school enrollment in Louisiana and the nation between fall 1971 and fall 1976 compiled by the Public Affairs Research Council[4] yielded the following results: (1) the Louisiana change in elementary school enrollment (grades 1-8) was -11.6% compared to the national decline of -11.2%; (2) the Louisiana percent change in high school enrollment (grades 9-12) was +7.9% compared to the national increase of +4.1%; and (3) the total change in fall public enrollments (grades 1-12 excluding kindergarten and special education) for Louisiana was -6.1% compared to the national average of -6.4%. Louisiana's slight relative loss in elementary enrollment was offset by a relative gain in high school enrollment.

declining enrollment

The National Center for Education Statistics[5] presented similar results when comparing public school average daily attendance for the school years ending 1970 and 1977: Louisiana had an overall percent change of +0.8% during this period, while the national percent change was -2.6%. Thus, Louisiana's losses in public school enrollment and attendance during this period of national decline were equal to or slightly less than the national average. Projected future trends in Louisiana's elementary and high school education systems will be discussed later in the narrative. (Different procedures were used by NCES and the Louisiana State Department of Education to calculate the average daily attendance figures presented here and in Table 4.)

Louisiana's recent enrollment figures are compared with national figures in Table 34. The state's public school enrollment was the eighteenth largest in the nation in 1980, and the state ranked sixth in percentage of students in nonpublic schools, behind only Pennsylvania, Hawaii, Delaware, New York, and the District of Columbia. The state ranks low, however, in average daily attendance as a percent of either enrollment (44th) or average daily membership (38th). The state had three of the nation's sixty largest public school systems according to a recent report[6] : (a) Orleans parish ranked #25 (b) Jefferson parish ranked #39; and (c) East Baton Rouge Parish ranked #43.

pupil retention rates

Table 35 presents a comparison of Louisiana and national pupil retention rates from the fifth grade through high school graduation. Over the last five selected years, Louisiana retained only 63.3% of its students in public and nonpublic schools as compared to a national retention rate of 74.3%. This low retention rate explains why Louisiana ranked below the national average in percent increase in number of public high school graduates from 1975-81 even though the state was ranked high in percent of the population who were school-age during that period.

ACT results

Data supplied by the American College Testing (ACT) program indicate that there was a decline in ACT scores both nationwide and in Louisiana from 1970 to 1981 (see Table 36). This decline occurred primarily from 1970-76 and the scores have remained relatively constant since that time nationally and in Louisiana.

A recent report by the Louisiana State Board of Regents[7] compared the ACT scores and high school gradepoint averages of first-time college freshmen in Louisiana with national scores. Although declining ACT scores have been accompanied nationwide by increased high school gradepoint averages, the Board of Regents found grade inflation in Louisiana to be below the national average for the period reviewed. High school averages in Louisiana for first-time freshmen went up 10% between 1969 and 1978, compared to a national increase of 16%. The mean high school average of Louisiana first-time freshmen who took the ACT in 1978 was 2.81 (on a four-point scale), compared to the national average of 2.99.

Not only does the ACT data reveal information concerning student performance in verbal and computational skills but it also presents information on student satisfaction with various aspects of high school education. Table 37 compares Louisiana student satisfaction to national student satisfaction with regard to specific aspects of high school programs. Among the areas receiving the highest ratings by Louisiana students were classroom instruction, grading practices and policies, the number and kinds of tests given, guidance services, and library or learning centers. The highest percentages of dissatisfaction were found in the number and variety of courses, school rules, regulations, and policies, laboratory facilities, provision for special help, and emphasis on career education and planning. Louisiana students were more satisfied than the national sample in eight of the eleven areas.[8]

SAT data

Comparative figures on the SAT (Scholastic Aptitude Test) entrance test present a different trend. As indicated in Table 38, Louisiana students scored well above the national average on the SAT from school year 1973-74 to school year 1980-81. The mean composite score for Louisiana students in 1980-81 was 955 compared to the national score of 890.

The contradiction in ACT and SAT national comparisons may be explained by differences in the student populations taking the two tests in Louisiana. Louisiana has one of the most liberal policies for admission to college in the nation, and the state requires that all freshmen take the ACT. Consequently, more students with marginal chances of success in college take the test in Louisiana than do nationwide. On the other hand, only those students going to out-of-state universities and in-state private universities take the SAT, while all freshmen take the test in certain areas of the country.

C. Staff Characteristics

pupil/teacher ratio

In 1978 the Public Affairs Research Council published a bulletin entitled Impact of Declining School Enrollments: Past, Present and Future. In this bulletin it was demonstrated that a decrease in students and an increase in teachers occurred in grades 1-12 (excluding kindergarten and special education) of the Louisiana public school system between school year 1969-70 and school year 1977-78. A similar analysis by the Bureau of Research[9] on data from 1970-71 to 1979-80 demonstrated a 9.7% decrease in students and a 2.7% increase in teachers during this period. These trends resulted in a decrease in the pupil-teacher ratio during the 1970s.

This trend in Louisiana followed a national tendency toward decreased pupil-teacher ratios in the 1970s that has continued into school year 1980-81. The National Education Association provides data that compares the trend for both the U.S. and Louisiana. These data can be found in Table 39. Louisiana ranked thirty-third in the nation in 1970 in teacher-pupil ratio and twenty-eighth in the nation in 1980. The pupil-teacher ratio in Louisiana decreased from 23.1 to 18.5 during that period. (Some differences exist in the figures produced by the NEA and PAR analyses due to different techniques for computation of the ratios.)

The Bureau of Research collected data on classroom size by classroom type for the first time in Louisiana during the 1980-81 school year. This data contains more valuable information than pupil-teacher ratios, which mask large differences in classroom sizes that exist between regular, special, and compensatory classes.

distributions of classroom size by classroom type

The distributions of classroom size by classroom type for elementary and secondary schools for school year 1980-81 are found in Tables 40 and 41respectively. Table 42 presents mean class size by class type. As tables 40 and 41 indicate, the highest percentage of regular classes is found in the medium class size range (20-24, 25-29). This applies to both elementary and secondary schools. Ungraded (continuous progress) classes in the elementary schools are also concentrated in this range.

Special education classes, on the other hand, are concentrated in the smaller class size range (5-9, 10-14). This also applies to both elementary and secondary schools. Compensatory education classes in elementary schools are also concentrated in the smaller class range. Vocational education classes are concentrated in two medium class size ranges (15-19, 20-24).

As Table 42 indicates, the mean class size for regular education classes in the elementary grades is 24.69, while it is 21.84 in the regular secondary grades. Mean class size for special education classes for the elementary and secondary grade levels are 8.28 and 8.26 respectively.

staffing

NCES estimated[10] that 40.8% of the staff employed by the public school system in Louisiana was nonprofessional, compared to the national percent of 33.8% in the fall 1978. On the other hand, only 53.6% of the staff in Louisiana were professionals involved in education (instructors, etc.), compared to 60.0% nationally. Louisiana ranks second among the states in percent of nonprofessionals employed and forty-eighth in percent of professional instructors (see Table 43).

teacher salary

While the state has maintained a pupil-teacher ratio comparable to the national ratio, the estimated average salary of public school teachers has been consistently below the national average. According to National Education Association estimates,[11] Louisiana paid its public school teachers 81.4% of the national average in 1969-70, 82.1% of that average in 1974-75 and 86.1% of the national average in 1979-80. The estimated average salary of public school teachers nationally was $17,264 in 1980-81, compared to the Louisiana average of $14,960. Thus, according to NEA Louisiana paid its teachers 86.65% of the national average salary in 1980-81.

It should be noted that data collected at the Louisiana State Department of Education indicates that classroom teachers in the state made $16,002 in 1980-81, or 92.7% of the national average. This figure is more accurate that the NEA estimate of Louisiana teachers' salary, since it is based on direct financial reports from the parishes.

The state ranks low in percent of male teachers in public elementary and secondary schools. In 1980-81, NEA estimated that 24.0% of the teachers in Louisiana were male, compared to the national average of 32.5%.

administrative units

Louisiana has a relatively small number of basic administrative units operating public school districts: sixty-six, one in each parish plus the cities of Monroe and Bogalusa. This is the eleventh smallest number of operating units in the nation.

D. Financial Characteristics

1. Financial Resources for Education

income statistics

In terms of personal income, Louisiana ranks low in income statistics and high in poverty indicators. As indicated in Table 44, Louisianians earned only 86% of the national per capita income in 1979. Also in 1979 Louisiana ranked forty-sixth in personal income per child of school age, averaging $9,000 less per child than the national norm. This low average is a result of the high number of school age children relative to the adult population and the low per capita income in the state.

school revenue -
where it comes from

While Louisiana's per capita personal income is well below the national average, the state is only slightly below the average in per capita total general revenue of state and local governments. Given Louisiana's low per capita income, state taxes are relatively high. As indicated in Table 44, the state ranked fifteenth in 1979 in revenue of state and local governments as percent of personal income. It is interesting to note that these relatively high state taxes are not a function of property taxes, since Louisiana has the second lowest per capita property tax revenue in the nation.

The National Education Association estimated that Louisiana ranked forty-second in the nation in public school revenue receipts per pupil in average daily attendance in 1980-81. Compared to national figures, Louisiana receives relatively less of its revenue for public education from local sources and relatively more from state and federal sources. The NEA estimated that Louisiana ranked third in the nation in percent of public education revenue from federal sources in 1980-81. The National Center for Education statistics estimated that the state ranked fifth in this category in 1978-79 (see Table 45).

tax
capacity

In a supplement to its basic volume, Tax Wealth in Fifty States, 1977, the National Institute of Education[12] presented tax capacity, effort, and collected revenue data for state and local governments. This supplement concluded that Louisiana under-utilized property taxes and slightly over-utilized sales and gross receipt taxes. While the state ranks relatively high in revenue of state and local governments as percent of personal income according to the NEA rankings, the NIE report concludes that the state is taxing well below its capacity relative to other states. In fact, Louisiana has one of the largest negative values in the nation for amount collected less potential tax yield. The major taxes being under-utilized are property taxes on commercial and industrial firms, public utilities, and residences.

2. Expenditures for Education

expenditures for education
and other government
functions

Table 46 presents a comparison of Louisiana and national direct expenditures for all government functions and for education from 1971-79. For each of these nine years, the percent of per capita income that Louisiana spent on all government functions was above the national average, ranging from an excess of 1.1% to 3.2%.

personal income/
educational dollars spent

In 1979, Louisiana's per capita personal income was 86% of the national per capita income. In school year 1978-79 the amount Louisiana spent per capita on education was 88.5% of the national amount spent. Thus, Louisiana's low ranking in amount spent per capita on education is a function of its low per capita income rather than a lower percentage commitment of personal income to education.

Louisiana spends larger
share of personal income
on education than national
average

Comparisons of state and national expenditures per pupil in average daily attendance and membership are found in Table 47. Louisiana spent approximately 79.2% to 85% of the national average expenditure for public schools per pupil in average daily attendance or membership for fiscal years 1979-80 and 1980-81. Although this expenditure is below the national average, the state did spend a percentage (4.37%) of its citizens' personal income on education in 1979 comparable to the national average (4.38%). Thus, again, the state's low rank on school expenditure is a function of low personal income, rather than low commitment to education.

per pupil expenditures

The National Center for Education Statistics[13] publishes an interesting comparison of the school systems of twenty large cities in the U.S. annually. In fiscal year 1977-78, the New Orleans public school system spent $1,647 per pupil in average daily attendance, compared to the national average for large cities of $2,195. Out of the nineteen cities ranked on this dimension, New Orleans placed fourteenth. The city spent more money per pupil in average daily attendance than did Houston, Indianapolis, Memphis, Phoenix and San Antonio.

Another publication by NCES presents the distribution of school districts by current expenditure per pupil. No school district in Louisiana spent more than $1,800 per pupil in the school year ending 1979; nationally, 26.4% of the school districts spent more than $1,900 per pupil in this school year (see Table 48).

spending by specific purpose

A comparison of the purposes for which Louisiana and the nation expended education funds in 1978-79 is found in Table 49. Louisiana spent less than the national percent for instruction, plant operation and maintenance, fixed charges, and attendance and health service in this year. It spent more than the national percent for administration, transportation services, other pupil services, including food services, and capital outlay.

III. PERSPECTIVES AND FORECASTING

A. Perspectives on Louisiana Education

educational attainment level

A number of interesting developments occurred in education in Louisiana during the past decade. The educational attainment of the state's citizens at the beginning of the 1970s was low: 13.1% of the adult population had fewer than five years of schooling, while only 42.3% of the adult population had completed high school and 9.1% had completed college.[14] By 1976 the U.S. Bureau of the Census indicated that only 8.7% of the adult population lacked a fifth grade education, while 58.3% had completed high school and 11.5% had completed college (see Table 33). Since this trend toward higher educational attainment by the state's adult population can be reasonably assumed to have continued through 1981, the past decade was characterized by a marked increase in the absolute educational attainment level of the state's citizens.

However, the state's rank in educational attainment relative to other states failed to improve from 1970-76. Louisiana had the highest percentage in the nation of its adult population with fewer than five years of education in both 1970 and 1976. In 1970 the state ranked forty-second in percent of its adult population with a high school education; the state dropped to forty-third in 1976. Similarly the state dropped from thirty-sixth to forty-first in percent of the adult population with a college education from 1970 to 1976.

Thus, educational attainment in Louisiana during the past decade was characterized by an improvement in the absolute number of years completed accompanied by a maintenance of rank relative to other states. Why didn't the state improve from 1970 to 1976 relative to other states? Two factors may have contributed to this failure to improve: (1) a very large percentage of the population had fewer than five years of education in 1940 (48.4%), 1950 (37.8%) and 1960 (27.9%) and many of these adults are still in the population in 1981; (2) since the state has an almost negligible migration rate (+0.6% from 1970 to 1979), there is little chance for an in-state migration of higher educated citizens or an out-of-state migration of lower educated ones.

decrease in student enrollment

As noted in Section I, another development in education in Louisiana in the past decade was the decrease in student enrollment. This decrease was produced primarily by a decline in elementary enrollment, while secondary enrollment stayed at about the same level during the period. This decrease in student enrollment was accompanied by a decrease in student-teacher ratios.

pupil/teacher ratio

While the pupil-teacher ratio decreased steadily throughout the past decade Louisiana's national rank changed very little over this period. As noted in Table 39, Louisiana had the thirty-third lowest ratio in 1970, compared to the twenty-eighth lowest in 1980. A PAR analysis[15] on declining enrollments published in 1978 concluded that, "Less can mean more--more competent and enthusiastic teachers, more learning in the classroom and more efficient use of funds and facilities--but only if there is proper planning, sound policies and a commitment to make these objectives a reality."

Recent analyses by Glass and Smith[16] of the studies examining the relationship between class size, student achievement, teacher morale and pupils' attitudes affirm the benefits of smaller classes. The following relationships were discovered by these authors: (1) as class size increases, achievement decreases; (2) in smaller classes, pupils have more interest in learning; and (3) in smaller classes, the morale of the teachers is better. Thus, the trend toward a smaller student-teacher ratio over the last decade may be regarded as a positive direction for Louisiana elementary and secondary education.

transportation

More than 595,000 public and nonpublic students have been transported to and from school annually during the past decade. The State of Louisiana operates more than 7,171 school buses, at an annual cost of approximately $135.00 per student. These buses have traveled an average of 60 million miles each year. The cost for this transportation, on an annual basis, has risen steadily during the decade with the cost for the 1979-80 school year being approximately 79 million dollars. More information for school year 1980-81 can be obtained by examining Item 19 on the State Summary Profile.

increases in
special education

The past decade was characterized by a large increase in the student population of special education. There was an increase of 67.8% (from 15,851 in 1971-72 to 26,593 in 1980-81) in the population in special education classes in public schools. This increase tells only part of the story, however, since that population includes only those students in self-contained classrooms. According to figures gathered for the minimum foundation program's equalization distribution,[17] there were 78,016.5 students enrolled in all types of special education classes at the end of the first reporting period in 1980-81. In addition to those students in self-contained classrooms, this figure includes 30,278 students enrolled only in speech therapy and 31,070 enrolled in resource special education classrooms. The total number of students in special education in 1979-80 was 75,827 according to the same source. See the State Profile for a breakdown of the special education students by type of class in 1980-81.

Total expenditures for special education in Louisiana increased exponentially during the past decade as can be seen in Table 50. State funds increased by more than 550% from 1972-73 to 1980-81, while federal funds in 1980-81 were forty-two times more than in 1972-73.

The passing of Public Law 94-142 (Education for All Handicapped Children Act) by Congress in 1975 was, to a large degree, the impetus behind the expansion of special education in the state. The law calls for individualized schooling for all physically, mentally and emotionally handicapped students. Act 754 of the 1977 Regular Session of the Louisiana Legislature, which encompasses Louisiana's state regulations in compliance with P. L. 94-142, was implemented in the local school systems in September 1978.

One immediate effect of this emphasis on special education was a dramatic increase in the number of evaluations carried out each year. According to a report on special education by PAR published in 1973[18], there were 8,863 evaluations of children for special education purposes in school year 1972-73. It is estimated[19] that 34,201 evaluations occurred in 1980-81. Additionally, 14,751 students received pupil appraisal support services in this year.

The number of children in the gifted and talented category increased from 698 in 1975-76 to 7,547 in 1980-81 according to estimates from the Office of Special Educational Services. Other significant developments in special education in the past decade included: (1) the establishment of statewide standards for the evaluation of each child (contained in the Pupil Appraisal Handbook, Bulletin 1508) in October 1978; and (2) the introduction of a nondiscriminatory intellectual achievement testing program [the System of Multicultural Pluralistic Assessment (SOMPA)] for placement in special education.

vocational-technical education

Slightly over $100 million was invested in the expansion of Louisiana's vocational-technical system to fifty-one schools during the past ten years. Enrollment and expenditures for vocational education programs from 1972-73 through 1980-81 are found in Table 51. The majority of the secondary students counted in Table 51 are in city/parish school systems. Total enrollment in vocational education programs in 1980-81 equalled 255,708 students[20].

Vocational Education Amendments of 1976 (Public Law 94-482) mandated new vocational activities including a displaced homemakers' program, the establishment of a sex equity coordinator position and special vocational education programs for handicapped persons. The displaced homemakers' program now has seven centers and enrolls approximately 1,000 students at the three centers which became operational in 1979.[21] Vocational programs for students with limited English speaking skills were also initiated in Louisiana during the decade.

Vocational education has begun an effort to meet the priority needs of energy education. The lignite coal deposit in northwest Louisiana has become a focal point in increased job opportunities in this section of our state. In response to this energy source, the Office of Vocational Education has funded a Research and Training Project to provide flexibility in skills training to meet the needs of lignite coal related industry.

adult education

Adult education continued to play an important role in Louisiana education during the last two years; 11,211 students received the general equivalency diploma in 1980, and 12,230 did in 1981.[22] Almost 21% of all high school diplomas issued in Louisiana were earned through the GED program in 1980-81. See Table 52 for a summary of enrollment, achievement and termination information for students in adult education from 1974-81.

B. Forecasting Louisiana Education in the 1980s.

It appears that several factors that influenced education in the 70s will continue to do so in the 80s.

- Declining student enrollment in elementary and secondary schools will continue through 1982-83. The Louisiana Board of Regents predicts that there will be an overall decrease in total enrollment through school year 1982-83, with modest increases occurring in 1983-84 through 1985-86. See Table 53 for enrollment projections by grade level through 1985-86.

- Enrollment in special education classes will continue to increase. According to P.L. 94-142 each child enrolled in special education must be provided an individual education plan, written in cooperation with school officials, teacher and parents. Further, renovation of some school facilities will be necessary because of the 94-142 legislation which requires that school sites be accessible and usable by the handicapped.

- Desegregation continues to be an important issue in the 1980s. Several districts continue to be involved in litigation. According to a 1979 HEW civil rights survey,[23] Louisiana ranked second behind Alabama in the list of states with the most segregated districts in the nation. This report[24] continues to be disputed by many Louisiana school officials and is a reflection of the importance of this issue. The Brumfield vs. Dodd case[25] will continue to have an impact upon school district funding since this decision made it unconstitutional for the state to give assistance to any racially discriminatory or segregated nonpublic school.

- Accountability and assessment will continue to be important in the 1980s. The 1979 Competency-Based Education Act 750 provided for the coordination of the previous student assessment and personnel evaluation activities begun under Act 621 of the 1977 Regular Session of the Louisiana Legislature. Act 750 requires an eventual merging of the Louisiana State Assessment Program and the Miniumum Competency Testing Program. (The MCT program is now being called the Basic Skills Testing Program in order to communicate more effectively with parents and citizens.) The total program will become the Louisiana Literacy Assessment Program. The fall testing program of reading, mathematics and writing in grades 4, 8, and 11 was converted to a spring testing program in grades 3, 7, and 10 in the 1980-81 school year. Act 750 requires the implementation of the Louisiana Literacy Assessment Program, and a component of this is the Basic Skills Testing Program. The program was implemented in the 1980-81 school year with the development and piloting of Grade 2 test items based on the basic skills minimum standards. In 1981-82 the test will be utilized as the principal criterion for a student's promotion to Grade 3. A student must score a minimum of 75% on both the language arts and math portions of the test. Each year thereafter an additional grade will be added for purposes of basic skills testing until 1992 when all students in grades 2-12 are being tested.

- Teacher salaries and teacher shortages will continue to be important issues. Teacher salaries, as compared to industrial salaries, continue to be significantly less. According to a February 14, 1982 story in the Baton Rouge Sunday Advocate, area industry pays a non-supervisory employee in the range of $24,000 a year plus fringe benefits, including paid vacation, and employees in many plants are able to boost their income by means of overtime pay. By contrast, this same news story stated that an average Baton Rouge teacher with ten years experience earns about $16,000 for 9 months work, with no paid vacations. The issue of teacher shortage is clearly related to salary. Opportunities, particularly in the areas of industrial arts, math and science, exist in industry. See Graphs 3 and 4 for more information on these two topics.

- Collective bargaining will be an important issue for Louisiana teachers in the 1980s. Unlike many other states, Louisiana has no collective bargaining statute for public employees. However, in recent years two bills have been introduced in this area. Several districts, including Jefferson, Orleans and East Baton Rouge had teacher strikes in the latter part of the 1970s and collective bargaining remains a viable issue before many local school boards.

- Act 750 of the 1979 Regular Session of the Louisiana Legislature called for compensatory programs for students who fail to meet the 75% mastery level on the Basic Skills Test as established by the Board of Elementary and Secondary Education. It is estimated that between 13-17% of the second grade population will fail this test. Remediation for summer school of 1982 is expected to cost approximately $2.1 million. Funding for remediation is expected to remain a critical need for several years.

Personnel evaluation is expected to accelerate during the 1980s. Although this responsibility belongs primarily to the local district, the state's monitoring role is likely to increase. To further strengthen the quality of teachers and administrators entering the teaching profession in Louisiana, Act 16 of the 1977 Special Legislative Session made passing the NTE a requirement for receiving initial state teaching certification. The Professional Improvement Plan (PIPS) was created by Act 207 of the 1980 Regular Legislative Session with the purpose of improving teacher competencies. The legislation allows teachers and other school administrators to create 5 year professional improvement plans for themselves and upon successful completion of these programs to receive substantial salary increases.

Funding Sources expected to decline during the first half of the 1980s. Essentially, the new Block Grant Concept will have three "Chapters". Chapter One is the old Title I program. Chapter Two consolidates 33 other title programs. Chapter Three contains regulations and funding information. While the total impact of the Block Grants cannot be assessed as of this writing, special education may experience as much as a 25% reduction, vocational education a 12½% decline and Title One an additional 7% cut. What can be stated with certainty is that Louisiana will lose hundreds of millions of dollars in federal education aid.[26]

Two recent publications, *Louisiana: Priorities for the Future* (sponsored by Governor Edwards, the Louisiana Legislature and the Council for a Better Louisiana) and *Focus on the '80s - 20/20 Solutions* (published by the Public Affairs Research Council)[27], listed recommendations to improve education in Louisiana during the next decade. The priorities for education recommended in *Louisiana: Priorities for the Future* are as follows:

1. Establish minimum proficiency requirements for students at all levels of education.
2. Review and upgrade certification standards for teachers, supervisors and administrative personnel with special emphasis on requiring proficiency in English and other basic skills.
3. Support classroom teachers with programs and policies to raise their effectiveness.
4. Establish a clearly defined, ongoing evaluation system for teachers, supervisors and administrators at the elementary, secondary and college levels - particularly for granting tenure.
5. Develop effective and appropriate approaches to deal with discipline problems.
6. Provide students with the best start possible in their academic careers.
7. Establish comprehensive guidance programs at all grade levels.

8. Develop and expand all programs for gifted and talented students.
9. Provide adequate funding of public education at all levels on a continuing basis to make quality education a reality.
10. Make a firm commitment to develop community support for public education.
11. Reorganize the structure and functioning of higher education.

Several of these priorities (1, 2, and 4) relate to teacher evaluation and student assessment. Highly recommended actions to accomplish priority three include providing adequate time for preparation and planning during school hours, extending employment to include a minimum of 10 extra days for teachers to use for planning and in-service training, and increasing teacher pay with built-in cost of living raises.

One recommended action to deal with discipline problems was to adopt a five-year "reduction in classroom size" schedule. In order to provide students with the best start possible in their academic careers, one recommendation was to initiate a mandatory kindergarten program statewide for all children aged five. One recommendation to make quality education a reality (priority nine) was to re-establish the dedication of the Severance Tax and other specific funds to education through a constitutional amendment.

In addition to these general education priorities, the report suggested five priorities in reworking the curriculum of public schools. These priorities are: (1) emphasize the basic skills: reading, speaking, writing, listening and mathematical computation; (2) encourage innovative new curricula designed to provide Louisiana's students with the basic skills and knowledge necessary to function successfully in today's complex society; (3) establish an intensive college preparatory curriculum; (4) pursue active programs for continuing and adult education; and (5) improve and expand the state's vocational/technical education programs.

The Public Affairs Research Council publication made the following recommendations for education changes in the 1980s:

1. Revamp the state school aid formula.
2. Improve teacher competency.
3. Abolish tenure for school administrators.
4. Change terms of local school boards.
5. Improve administration of vo-tech schools.
6. Appoint the state superintendent of the education.

The broad spectrum concerns in these publications encompass both student-oriented and educator-oriented priorities.

It appears that no comprehensive legislative packages will be introduced in the next few years since most of the measures dealing with improved student performance and legislation affecting teachers have been enacted. Rather, the focus for educational improvements for the early years of the 1980s shall be to successfully implement the intent of previously passed legislation. School improvement is expected to occur in two areas: (1) increasing student performance and (2) upgrading opportunities for professional development of Louisiana educators. The 1980s promise to be an era of continued growth and improvement for the Louisiana educational system.

Why the shortage?

In Louisiana, according to people familiar with the problem, the main causes are these:

— Too few students majoring math and science teaching are entering the state's colleges of education.

— Many of those who do graduate are lured directly into industry by higher salaries.

— Even if they obtain certification as teachers, many eventually leave teaching, often for higher pay.

* 1979-80 was the first year that districts were asked to report the number of Hispanic, American Indian and Asian students who were registered in their schools. Some districts noted difficulty in reporting this information, so there is probably an undercount of students from these ethnic groups for this year.

[*] The dropout data reported here were collected by the Bureau of Student Services in the Louisiana State Department of Education. Enrollment data from which percentages were calculated were taken from Annual Reports of the Louisiana State Department of Education. The percentages were calculated by the Louisiana State Department of Education.

[**] Dropout data for 1980-81 were not available for Natchitoches parish. Registration data from Natchitoches parish were not included in calculation of the percent of total registration who drop out.

[***] The sum of the percent of registration who are white plus the percent of registration who are black does not equal 100 percent in 1980-81, because 1.3 percent of registered students were classified as other race, not white or black.

* Experience of principals and teachers was reported by the districts in 1979-80 in the following categories: 0 years, 1-2 years, 3-5 years, 6-9 years, 10-12 years, 13-14 years and 15 or more years. This categorization is different from that reported for the years 1970-78. In order to obtain comparable data across the decade, an extrapolation was performed on the 1979-80 data. Category 0-4 years experience for 1979-80 includes categories 0, 1-2 years and 2/3 of the number reported for category 3-5 years. Category 5-9 years experience for 1979-80 includes 1/3 of the number reported for category 3-5 years plus all those in category 6-9 years.

** This figure does not include 38 principals from Ouachita Parish for whom experience data were unavailable.

* These totals do not include students in kindergarten or special education. The total figures for the projections for grades 2-12 do not equal the combined projections for public and nonpublic schools. The reason for this is that each phase of the model-public, nonpublic, total-uses numbers relative to that phase only. The projections for 1981-86 were made by Mr. Larry Goux of the Louisiana Board of Regents. His projections exclude kindergarten and special education students.

SCHOOL DISTRICT PROFILES

SCHOOL DISTRICT PROFILES

General Explanation

This is the third year of the Annual Report in which data gathered for each of the parish/city districts are in one place, rather than being spread throughout the report. This format aids readers interested in detailed information on a particular school district. A Louisiana state summary profile precedes the individual district profiles and includes aggregate data for the state. This state profile supplements the data found in the state summary tables.

Please note that the entry NA appears throughout the profiles. This entry means data were not available for that district on that piece of information.

Footnotes are also found throughout the profiles. Instead of repeating each footnote for each profile, the footnote is included only once in this general explanation. Please read the following footnotes before turning to the state and district profiles:

A - Student registration is recorded at the beginning of the year and does not include gains or losses.

B, E - The Bureau of Research is grateful to Mr. Larry Goux of the Board of Regents' staff for supplying the projections for school registration for 1981-85. The following notes further explain these projections and how they were used by the Bureau of Research for the school district profiles:

(1) There are no projection figures for registration in the cities of Monroe and Bogalusa. The projected registration figures for Monroe and Bogalusa are included in the projected nonpublic registration figures for Ouachita and Washington parishes.

(2) For Sabine and Winn parishes, nonpublic registration projections were changed to zeros by the Bureau of Research since nonpublic schools no longer exist in these parishes. The Board of Regents' projections for 1981-85 included projections for these parishes because there were nonpublic shools in these parishes when the projections were done.

(3) For Beauregard parish, nonpublic registration projections were changed to zeros by the Bureau of Research since there are no nonpublic schools in the parish. The Board of Regents' projections for 1981-85 had included projections for the first grade for nonpublic schools in Beauregard.

(4) For Livingston parish, nonpublic registration projections were changed to NAs because the Board of Regents' projections were too large in the higher grades. Small numbers in the lower grades resulted in large numbers in the higher grades due to the projection formula employed by the Board of Regents.

(5) The total nonpublic projection figures included in the state profile are those found in the Board of Regents' projections. These total nonpublic projection figures do not include any of the parish changes noted in (2), (3), and (4) above.

C The total public school registration figure in the state profile for 1980-81 includes nine students who were postgraduates.

D - Washington parish did not report the number of nonpublic students registered in the parish for 1980-81.

F - These totals include special education and postgraduate students. The postgraduate students are included in the 9-12 totals.

G - Natchitoches parish did not report the number of students in the parish who dropped out for 1980-81.

H - Lafayette parish did not report the number of nonpublic schools in the parish for 1980-81.

I - Other instructional personnel includes part-time teachers, curriculum specialists, guidance counselors, librarians, media specialists and other professional/technical personnel.

J - Support staff includes office/clerical workers, crafts/trade workers, laborers, and service workers.

K - % = percent of full-time staff for that row.

L - Lafayette parish did not report the number of nonpublic personnel in the parish for 1980-81. School year 1980-81 was the first year that the districts were asked to report personnel data in a new more detailed format. Some districts indicated that these data were not completely available for 1980-81, so the figures reported here are probably smaller than the true numbers of personnel. It is anticipated that the 1981-82 data will be more accurate due to improved data collections procedures.

M - School year 1980-81 revenue figures do not include Federal Indirect Cost as in prior periods.

N - The amounts indicated in the bonded indebtedness section are directly from the Parish Financial Statements. These statements are not derived from audited figures. Debt service amounts may be indicated as bonded debt in some instances.

O - In Item 20, the districts were ranked from the one with the largest value (1) to the one with the smallest value (66) on all categories except one: the ratio of public students to teachers where the ranks were reversed.

P - School year 1979-80 figures are for current expenditure per registered pupil. School year 1980-81 figures are for current expenditure per pupil in average daily membership. Current expenditures for 1979-80 included all expenditures except capital outlay; current expenditures for 1980-81 included only instruction and support services.

Q - School year 1979-80 computations include part-time as well as full-time teachers. School year 1980-81 computations include only full-time teachers.

R - School year 1979-80 mean salary figures were for all instructional personnel including psychologists, librarians, guidance counselors, media aides and teacher aides. School year 1980-81 mean salary figures are for classroom teachers only.

S - Per capita figures were not available for the cities of Monroe and Bogalusa. See per capita figures for the parishes of Ouachita and Washington.
